

SOLAR ENERGY & ENVIRONMENT TECHNOLOGY CO.

NGO-150 (Open-Loop System)

Physical Data:

- * Length = 191 Cm.
- * Width = 118.5 Cm.
- * Hight = 212 Cm.
- * Weight = 160 Kg.
- * Collecting area = 2m².

Specifications:

- * High quality solar collectors with high absorption efficiency.
- * High annual power saving, annual solar fraction = 93 (+- 5 %).
- * Daily consumption = 150 Lit / Day, with average temperature = 50 C.
- * Galvanized steel tank with high corrosion resistance 2 : 3 mm.
- * System contains an electrical booster with automatic control.
- * Easy to install and does not need specialized technicians.
- * Annual maintenance and 100% environment friendly.
